

Swift third grade students were excited to sit through an assembly on May 12 presented by the Franklin Institute Traveling Science Fair. This year third grade Teachers, Terilee McGowan, Laura Grimes, Nanci Barr, Traci Higgins, Renee Smith and Kim Cochrane applied for a mini grant from the EHT Education Foundation. They were awarded the \$500.00 grant to bring the Traveling Science Fair to Swift. This year the focus was on the three laws of motion. Students were attentive and excited to participate. Thanks to the Ed Foundation and third grade teachers for making the Traveling Show possible for Swift!
